FULL ENGAGEMENT

Assessment through implementation

Put the response into practice with your team.

When agreed priorities are not translating into progress, I work with your team to understand what is holding delivery back. Together, we develop a workable response and put it into practice, adjusting as we learn what helps delivery move forward.

WHAT YOU RECEIVE

01 **An assessment and response**

Understand the constraints and agree the changes with the people involved.

02 **Support on live work**

Put the response into use, review what happens and adjust as difficulties emerge.

03 **A practical handover**

Prepare your team to continue, with clear responsibilities and a record of issues still open.

Use this when your team needs support to put the changes into use.

WORKING TOGETHER

A defined engagement

We agree the scope, fee and timing, including how progress will be assessed. Sound prior work can provide the starting point.

Includes implementation support and handover. Your organisation retains approval authority; ongoing programme management is outside this scope.

PRIOR INSTITUTIONAL EXPERIENCE

100+ projects

20+ countries

I designed and led changes across this portfolio, working with teams to revise planned work and improve how delivery decisions were made.

Let's discuss your priority.
